

VIPER VACUUM STABILIZER

SOFT AND SECURE BEATING HEART STABILIZATION TECHNOLOGY

The Viper Vacuum Stabilizer™ combines Soft-Touch™ footpads for minimal tissue trauma and excellent stability for access to all coronary arteries.

Viper Features

- Soft-Touch footpads minimize tissue trauma
- Malleable footpads provide optimal positioning
- Rotating footpads thin epicardial fat
- Integrated Blower-Mister optional feature
- Stabilizer fits other sternal retractors

**Soft-Touch
Rotating Footpads**

**Optional Integrated
Blower-Mister**

VIPER VACUUM STABILIZER SYSTEM

The single-use Viper Vacuum Stabilizer with its unique footpad design and flexible material delivers superior stability and performance during beating heart procedures.

Soft-Touch Vacuum Footpad

- Raised-ridge cavities lock in vacuum
- Maintains suction on uneven cardiac contours

Retractor System

- Low profile rail system with disposable suture stays
- 3-sided mounting

Attached Blower-Mister

- Eliminates need for operator assistance
- "Hands free" operation
